EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Meera Narasimhan on May 2, 2005.

The application has been amended as follows:

Claims 29-59 and 61-93 have been cancelled.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a membrane battery vent comprising a gas selective permeable membrane formed on the porous substrate adjacent to the opening in the vent housing.

The arguments set forth in the Appeal Brief filed February 15, 2005 are persuasive. The prior art, such as Jones, teaches a microporous single piece plastic section hydrophobic to the electrolyte and having pores to allow oxygen and hydrogen gas to pass from the gas space into the catalyst membrane. Therefore, the reference is silent to a gas selective permeable membrane formed on the porous substrate. Therefore, the instant claims are patentably distinct from Jones.
